New Product

Intelligent Control & Constant Temperature

Multiple Alarms Bring More Security

YC-650L

Real Air Cooling

The multi-duct vortex refrigeration system and finned evaporator can prevent frosting completely and improve temperature uniformity to a large extent.

Real Energy Saving

The refrigerator is equipped with "M + Energy Core" power management system and complete air cooling design, improving energy saving efficiency by more than 40%.

Real Visibility

The electrical heating + LOW-E design with double considerations can achieve a better anti-condensation effect for the glass door.

Real Safety

6 temperature probes can ensure high precision of temperature control with nearly no fluctuation and thus can improve safety.

Intelligent Temperature Control

- High-precision microcomputer temperature control system with built-in control/alarm sensors for High/ low temperature, ambient temperature and evaporator temperature etc. ensuring the safe and stable running.
- 1 inch high brightness digital temperature display with 0.1°C display precision; the temperature can be set freely.

Security System

- The well-developed audible & visual alarm system with multiple audible & visual alarm functions: high temperature alarm, low temperature alarm, sensor failure alarm, door ajar alarm, power failure alarm etc;
- The turn-on delay and stopping interval protection function can ensure reliability in running;
- The door is equipped with a lock, preventing it from opening accidentally.
- Refrigerator programmed to alarm again if alarm event still existed 30mins after Mute-on, this can help avoid any unknown alarm event to happen.

Refrigeration System

Equipped with a compressor supplied by an international famous Secop brand, high-efficiency air-cooled condenser and finned evaporator, ensuring fast refrigeration.

Optional chart recorder

- This technology provides you with temperature recorders without electronics.
- No power supply is required.
- European imported brand, durable and reliable

Data Storage

- Equipped with a USB export interface, which can be used for exporting data in PDF;
- When a U-disk is connected, temperature data can be stored continuously and automatically (data can be stored for 100,000 sets of data);
- The printer is optional.

Lighting System

Equipped with lighting system with LED lights, ensuring high visibility inside the cabinet.

Human-oriented

- Equipped with high-quality shelves made from PVC-coated steel wire, which are easy to clean;
- Aluminum door handle, easy to open, easy to move.
- Equipped with testing port, bringing convenience to users in testing temperature inside the cabinet.

✓ Scope of Application
