

DC-240 MA

Portable, high capacity medical grade body composition monitor with dual frequency reactance BIA technology

The DC-240 MA offers the latest Dual Frequency Reactance BIA technology in the lightest medically approved body composition monitor, weighing just 4.7kg.

It has been developed with input from healthcare, fitness and weight management professionals and its portability makes it ideal for mobile consultations, community work or field research studies.

It displays weight, body fat %, body water % and BMI readings on the oversized, easy to read display.

When combined with our Tanita Pro software, it provides 8 additional measurements, such as muscle mass, visceral fat and basal metabolic rate.

The Tanita Pro software, allows for automatic set-up for personalised patient studies, capturing measurements and trend results in a variety of reporting formats.

Dual frequency with reactance technology

Tanita Dual Frequency BIA technology utilises the fluctuating REACTANCE and RESISTANCE measurements within an optimised algorithm to provide the highest body composition accuracy.

Benefits

- 1. Improved accuracy of body water analysis**
 - Correction about Underestimate of %FAT by a edema
 - Correction about Overestimate of %FAT by dehydration
