

Invented for life

Vivalytic MG, MH, UP/UU

Qualitative Real-time PCR Test for the Detection of *M. genitalium*,
M. hominis, *U. parvum*/*U. urealyticum* at the Point of Care

✓Vivalytic from Bosch –

The universal diagnostic platform.

Universal, intuitive, fast.

Vivalytic MG, MH, UP/UU

Qualitative Real-time PCR Test for the Detection of *M. genitalium*, *M. hominis*, *U. parvum*/*U. urealyticum* at the Point of Care

According to the World Health Organization (WHO), over 30 different bacterial species, viruses and parasites have been identified as being involved in the spread of sexually transmitted infections (STIs), with more than one million STIs acquired worldwide every day¹.

M. genitalium, *M. hominis*, *U. parvum*, and *U. urealyticum* belong to the group of human pathogenic bacterial species associated with STIs even though particularly *Ureaplasma* spp. are primarily considered as commensal organisms². All four bacterial species can be detected simultaneously with Vivalytic MG, MH, UP/UU, the new member of the Bosch Healthcare Solutions Vivalytic product portfolio. Since a test result of Vivalytic MG, MH, UP/UU is available

after one hour at the point of care no further transport of specimens to a specialized laboratory is necessary. The immediate result is beneficial both for the patient and for the containment of STIs.

Vivalytic MG, MH, UP/UU – Point of Care for STIs

- Time to result: in one hour
- Only a few steps from sample to result
- No transport of specimen necessary
- No further laboratory equipment needed
- Simultaneous identification of *Mycoplasma* spp. MG, MH, and *Ureaplasma* spp. UP/UU
- Clinician is offered the possibility to receive a POC result

Sample material

Swab (urethral, vaginal, cervical, rectal), urine

Volume

300 µl

Detection method

Real-time PCR test

Detectable pathogens

- *Mycoplasma genitalium*
- *Mycoplasma hominis*
- *Ureaplasma parvum* and/or *Ureaplasma urealyticum*

Vivalytic workflow: Only a few steps from sample to result

1 Scan sample code.

2 Scan cartridge code.

3 Insert the sample and close cartridge lid.

4 Insert cartridge. The test starts automatically.
